DETAILED ACTION

This action is in response to the filing on March 29, 2010 of a response to the Office Action of September 29, 2009. The application currently contains 32 claims with claims 1, 8, 15 and 24 being independent.

Response to Arguments and Amendments

The amendments to the Specification have been entered and the objection to the Specification has been withdrawn.

The cancellation of claim 36 renders the rejection of that claim moot.

The amendments to the independent claims have overcome the rejections under 35 USC 103. Applicant's arguments, see Pages 10-13, filed March 29, 2010 with respect to the rejections under 35 USC 103 have been fully considered and are persuasive. The rejection of all claims has been withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Fainberg of Arent Fox LLP on June 3, 2010. The application has been amended as follows:

In claim 28, line 1, replace "25" with - - 24- - .

In claim 29, line 1, replace "25" with - - 24- - .

In claim 30, line 1, replace "25" with - - 24- - .

In claim 1, line 10, replace "deffuse" with - -diffuse- - .

In claim 8, line 7, replace "deffuse" with - -diffuse- - .

In claim 15, line 7, replace "deffuse" with - -diffuse- - .

In claim 24, line 4, replace "deffuse" with - -diffuse- - .

Allowable Subject Matter

Claims 1-21, 24, 26-31, 34-35, and 37-38 are allowed.

The following is an examiner's statement of reasons for allowance: In a robot with a motion unit, a sensor unit and a processor operatively coupled to the sensor unit to determine one or more features of the environment based at least in part on one or more frames of distance indications from the sensor unit and to control the motion unit of the robot to avoid the one or more detected features, it is known for the sensor unit to comprise a two-dimensional array of detectors supported by the motion unit, each detector having a counter associated therewith, the 2D array operable to generate a frame of distance indications to one or more features in the environment in which the robot operates, and an infrared sensor including: an infrared light source configured to produce a plurality of pulses of infrared light toward the environment of the robot and at least one optic element configured to focus a plurality of reflections of the infrared light pulses from the environment to the 2D array of detectors, causing the detection of the

2D array of detectors. However, it is not known from the prior art to modulate the pulses of infrared light nor to detect low-energy diffuse reflections because of the modulated pulses.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIN B. OLSEN whose telephone number is (571)272-9754. The examiner can normally be reached on Mon - Fri, 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas G. Black can be reached on 571-272-6956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
